A Bridge between Europe and Asia

New Perspectives in the Educational Research

→ INTERNATIONAL CONFERENCE

The International conference focuses on two main targets. On one side, the final task of the conversations is to widen the European perspectives about the adult and continuing education. On the other side, the conference offers the opportunity for a comparison between Europe and Asia and, in particular with South Korea. In this period is particular necessary to consider the vision of education from other countries for listening, opening up and seeing others. Educational researching means understanding different cultures and lives and the final aim of adult education is to go towards the others without prejudices and boundaries.

■ Light lunch | 1 pm

■ 2 pm
