

Elam e Awan

3000-2400 a.C.

- Sumerogramma **NIM.KI** ricorre in alcuni testi di Uruk (lista di schiavi, lista di ufficiali)
- Ricorre in testi protodinastici di UR e di Fara come luogo di provenienza di alcune persone i cui nomi però non sembrano avere radici elamiche
- In alcuni testi di Abu Salabih si nomina un dio ^d*Lugal-NIM*.
 - ^d*Lugal-aratta*
 - ^d*Lugal-NIM*
 - ^d*Lugal-shushinak*
- Lista dei re (SKL)
 - Ermebaragesi di Kish attacca **Elam**
 - Ur fu attaccata e cade sotto il dominio di **Awan**
 - **Awan** fu attaccata e cade sotto il dominio di Kish
- Testi presargonici di Lagash
 - Governo di una dinastia elamita basata ad Awan
 - Serie di conquiste durante il regno di Eannatum in cui si riportano campagne contro Elam, Mishime, Arawa e Uru'aza
 - Periodo in cui questi territori non più bellicosi intrattengono relazioni commerciali con Lagas

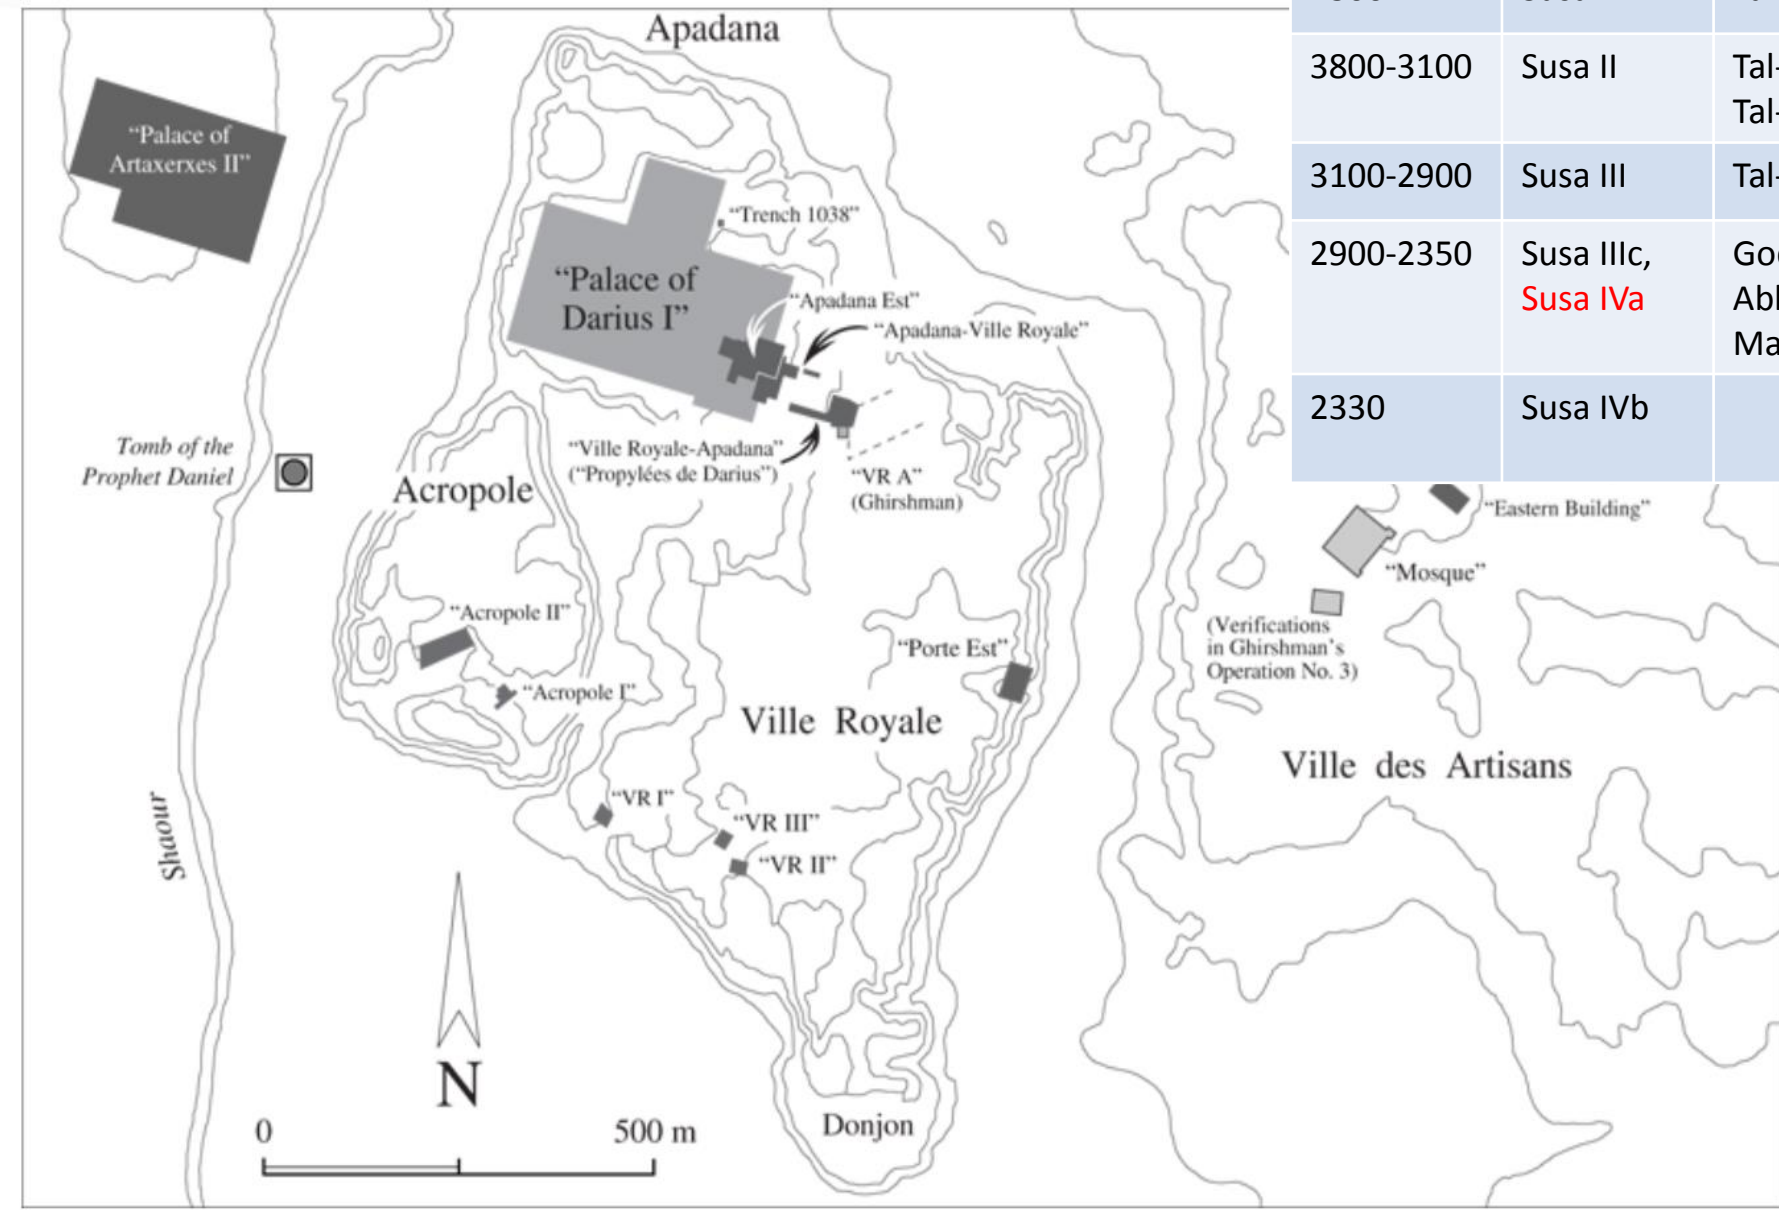

AWAN, name of a place in ancient western Iran, the nominal dynastic seat of Elamite rulers in the late third millennium B.C.; its location is unknown.

Three rulers of Awan form the fourth post-diluvium “dynasty” in at least four manuscripts of the Sumerian King List. The King List is a schematic and tendentious document (possibly compiled as early as 2100 B.C., though extant manuscripts are two to four centuries younger); the context of the Awan section suggests that it was meant to refer to a period beginning ca. 2500-2400 B.C. Its historicity is questionable.

Susa

Data (a.C.)	Lowland	Highland	Mesopotamia
4300	Susa I	Tal-i-Bakun A III-IV	Ubaid III-IV
3800-3100	Susa II	Tal-i Bakun A (Lapui) Tal-i Malyan early Banesh	Uruk medio e tardo

Impronta di sigillo Susa IV

Vase à la cachette (ca. 2500 a.C.), Susa

Il tesoro chiamato « le vase à la cachette » era originariamente raccolto dentro due contenitori con coperchio, ritrovato sull'acropoli di Susa. Il secondo vaso in ceramica era chiuso da un coperchio in rame. Ne è rimasto uno solo. Entrambi i vasi contenevano molti di oggetti tra cui sei sigilli, che vanno dall'epoca protourbana e protoelamita (3100-2750 a. C.) per i più antichi, mentre i più recenti possono essere datati intorno al 2450 a. C. 29 contenitori, di cui 11 in alabastro, uno specchio, utensili e armi in rame e bronzo, 5 basi di crogiuoli in rame, 4 anelli (3 in oro e uno in argento) una piccola figurina in lapis-lazuli, 9 vaghi in oro, 13 piccole pietre e un contenitore smaltato.

7 Period VI pottery.

Godin Tepe

- **Period IV.** Exposed over about 500 m² it represents a major incursion from the north into the central western Zagros of the Transcaucasian Early Bronze I culture (best identified in Iran at Yānik Tepe in Azerbaijan). At Godin this phase yielded village houses, elaborate ceremonial open air-structures on the then summit of the mound, and an industrial area (metal working?). The “invasion” of this culture from the north is probably responsible for the abandonment of the Period V oval enclosure, since it would have completely disrupted east-west trade along the Khorasan Road. Dates for Period IV are around 3000-2650 B.C.E.

- Period III. Exposed over an average of 700 m² it is an uninterrupted sequence for some 11 m of Bronze Age occupation. Six sublevels are identified stratigraphically and by distinct changes in both painted and plain ceramics. At least one sublevel (III:2) was destroyed by earthquake. At this time Godin was the largest site in the valley, which was quite densely occupied, and may be called a town, since pottery was manufactured in centralized workshops and meat was sold from butcher shops.

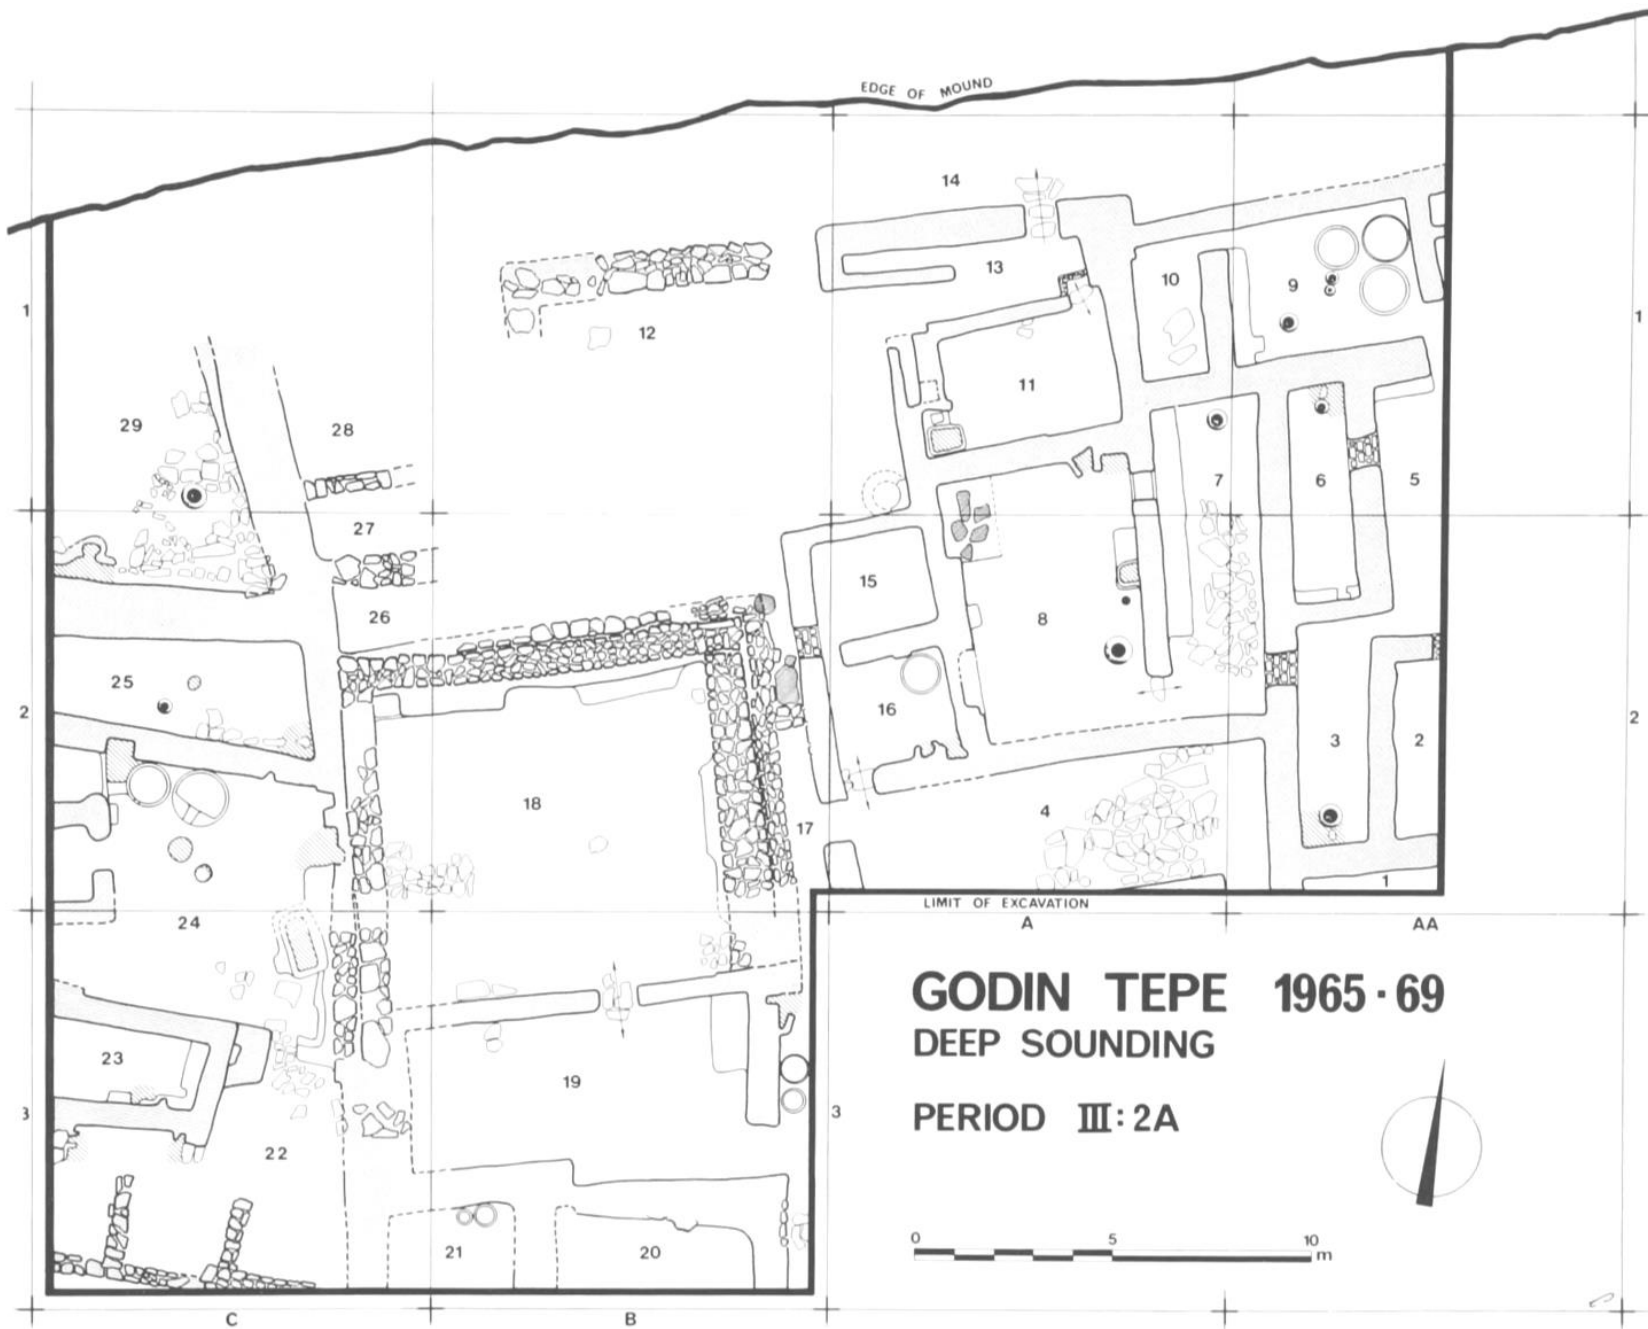

Plate V: Remains of mud plaster storage bins and two cooking vessels on the floor in the northeast corner of room 9, Level III₂.

21 Period III pottery and small finds.

Plate XV: Typical inhumation of Period III: Operation M1, Burial 5 (v. also Fig. 26).

Godin Tepe III, cimitero

All of the Period III burials in the cemetery were flexed, lying either on their right or left sides. They displayed no consistent pattern of orientation. All were laid in simple grave cuts, usually oval in plan and rarely much larger than was needed to take the body and its grave goods. Grave offerings were either at the foot or, more usually, the head of the body, and sometimes at both foot and head. Often, but not always, joints of meat were included among the grave goods, and offerings varied in richness from grave to grave.

Awan?

- Il materiale trovato a Godin Tepe si ritrova in tutte la valli che collegano il Luristan con il Kuzestan
- Il repertorio ceramico dipinto di godin Tepe III è simile a quello di Susa IV
- Esempi di questo materiale ceramico sono ritrovati anche a Lagash
