**Cav. ARSENIO BORGNINI**

Socio fondatore, Presidente ed Amministratore Delegato dal 14 Luglio 1974.

**1981** Premio “Della fedeltà al lavoro e del progresso economico” istituito dalla C.C.I.A.A. di Perugia.

**1990** Premio “Umbria che cambia – settore imprese” istituito dalla CONFCOMMERCIO con la sua organizzazione ASSOSERVIZI“ ... per l’impulso dato alla crescita imprenditoriale ed innovativa dell’Umbria...” motivato dalla “realizzazione di profilati metallici formati a freddo destinati ai più svariati usi, non ultimo attrezzature ed impianti stradali, per essere riusciti a realizzare con propri brevetti un prodotto apprezzato in Italia e buona parte dell’Europa”.

**1993** Ha ricevuto l’onorificenza di Cavaliere dell’Ordine “al merito della Repubblica Italiana”.

**1993** Presentato e concesso brevetto d’invenzione per arcarecci rinforzati “ORP, URP, CRP”, i quali hanno subito riscontrato un rilevante consenso da parte del settore delle carpenterie metalliche per i notevoli vantaggi offerti sia dal punto di vista strutturale che economico.

**Cav. ARSENIO BORGNINI**

Founder, President and Managing Director since 14 July 1974.

**1981** “Fidelity to Labour and Economic Progress” Prize awarded by the Perugia Chamber of Commerce.

**1990** “Changing Umbria – Businesses” Prize awarded by CONFCOMMERCIO (Italian General Federation of Commerce and Tourism) with its “ASSOSERVIZI” organization ... “for the boost given to the innovative and business growth of Umbria...” motivated by the “making of cold-formed metal structural shapes for a wide variety of uses, including street furniture and traffic systems, and for succeeding in creating with its own patents a product used all over Italy and in most of Europe”.

**1993** Conferred with the honour of “Knight of the Order of Merit of the Italian Republic”.

**1998** Applied and granted an invention patent for reinforced girders “ORP, URP, CRP”, which have been a great success for the remarkable advantages both structural and economic

**PROFILUMBRA** è stata costituita nel 1974 su un'area di 5.000 mq di cui 800 coperti. Attualmente il suo stabilimento occupa un'area di 30.000 mq di cui 10.000 coperti.

L'attività è divisa in cinque settori distinti:

- Lavorazione primaria del coil;
- Settore produzione profilati a freddo;
- Settore lavorazioni secondarie dei profilati;
- Divisione forniture stradali;
- Divisione Impianti ed Attrezzature.

### **SETTORE LAVORAZIONE PRIMARIA DEI COIL**

La sua funzione è quella di trasformare i coils in nastri, lamiere a fogli e lamiere cesoiate, destinate in parte all'alimentazione degli altri settori produttivi. Ha una capacità produttiva annua di oltre 40.000 t.

### **SETTORE PROFILATI A FREDDO**

Relativamente al fatturato ed all'impiego dei dipendenti, è il settore più importante dell'azienda; vi vengono realizzati profilati di ogni sagoma, anche su richiesta, eseguiti sia con macchine profilatrici che con presse piegatrici. Ha capacità produttiva annua di oltre 25.000 t.

### **SETTORE LAVORAZIONI SECONDARIE**

In questo settore si eseguono lavorazioni di finitura dei profilati metallici come foratura, punzonatura, imbutitura, tranciatura, saldatura, zincatura a caldo, marcatura dei singoli pezzi, ecc.

### **DIVISIONE FORNITURE STRADALI**

È il settore più giovane dell'azienda ma sicuramente uno dei più importanti in proiezione futura. Infatti forte di una intensiva attività di ricerca e sviluppo offre sistemi completi e complessi per la sicurezza della circolazione stradale, molti dei quali sono coperti da brevetto, come il sistema di rivestimento gallerie longitudinale, il sistema a fascia continua LUXVIA anti-abbagliamento montato su barriere spartitraffico New Jersey, Guard-Rails, ecc..., le barriere stradali con pannelli fonoassorbenti e fonoisolanti, la macchina pulitrice per rigenerazione del rivestimento di ogni galleria, rivestimento in legno di barriere metalliche esistenti. Pulizia, manutenzione e rigenerazione di guard-rail. Dispositivo antiribaltamento antiurto, antisonno e antisfondamento da NEW JERSEY.

### **DIVISIONE IMPIANTI ED ATTREZZATURE**

Riguarda la costruzione di vendita di: rullerie, stampi e di impianti ed attrezzature per la lavorazione della lamiera, realizzati con sistemi ad alta tecnologia.

Grazie, quindi, all'insieme di questi settori, PROFILUMBRA ha acquisito un'autonomia completa ed è oggi in grado di risolvere qualunque tipo di problema tecnico, con la realizzazione dei profilati completi, anche particolari, ricavati direttamente dai coils.

**PROFILUMBRA** was founded in 1974, on a 5.000 m<sup>2</sup> site, with 800 m<sup>2</sup> of indoor space. Today the plant occupies an area of 30.000 m<sup>2</sup>, with 10.000 m<sup>2</sup> indoors.

The company is divided into five production divisions:

- Primary coil processing;
- Cold-formed structural shape production;
- Secondary processing of structural shapes;
- Street furniture and traffic systems division;
- Plants and equipment division.

### **PRIMARY COIL PROCESSING DIVISION**

This division is responsible for transforming coils into metal bands, sheet, and sheared sheet. Part of this production is sold and part remains within the factory for use in other production divisions.

Annual Production Capacity: over 40,000 metric tons.

### **COLD-FORMED STRUCTURAL SHAPE PRODUCTION**

This is the company's most important division in terms of turnover and number of employees; here all types of structural shapes, including custom-made shapes, are produced with forming machines as well as bending brakes.

Annual Production Capacity: over 25,000 metric tons.

### **SECONDARY PROCESSING DIVISION**

In this division all the finishing work on metal structural shapes is done, such as drilling, punching, drawing, shearing, welding, hot galvanizing, marking of individual pieces, etc.

### **STREET FURNITURE AND TRAFFIC SYSTEMS DIVISION**

This is the newest division in the factory, but undoubtedly one of the most important for future growth. With its ongoing research and development, this division offers complete and sophisticated traffic safety systems, many of which have been patented, such as the longitudinal continuous band tunnel lining system, the LUXVIA anti-glare system installed on top of concrete dividers, guardrails, etc., road barriers with sound-deadening and sound insulating panels, machines for cleaning tunnel linings, and wooden paneling for existing metal barriers.

Cleaning, maintenance and overhauling of guardrails. Safety devices and systems on concrete dividers and guardrails to prevent overturning, collisions, and the breaking through of barriers, as well as noise-making devices for waking up drivers who have fallen asleep.

### **PLANTS AND EQUIPMENT DIVISION**

This division deals with the construction and sale of rollers, dies, plants and equipment for processing sheet metal, designed and constructed using high-tech systems.

With these divisions, PROFILUMBRA has thus become fully independent, and today it is able to solve any type of technical problem whatsoever, with the manufacturing of complete structural shapes, also in special shapes, directly from coils.

### **Caratteristiche fornitura**

I pesi e le quantità da essi derivanti, ottenute dalle seguenti tabelle hanno valore teorico e quindi all'atto della fornitura potranno subire variazioni nella misura  $\pm 10\%$ . Tale variazione, per esigenze di lavorazione è valida anche per le quantità indicate sulle conferme d'ordine.

La Profilumbra S.p.A. in qualsiasi momento e senza alcun preavviso si riserva di apportare alla propria produzione le modifiche ed i miglioramenti che riterrà necessari.

I valori riportati nel prontuario sono da considerarsi teorici, l'utilizzatore è responsabile della corretta interpretazione dei dati in merito ad ogni singolo caso di impiego.

### **Forniture supplementari**

**La Profilumbra S.p.A.** è in grado di fornire alla propria clientela una vasta gamma di servizi accessori che completano il quadro di una azienda organizzata al servizio degli utilizzatori.

Lavorazioni aggiuntive su qualsiasi sagoma di profilo di nostra fornitura che comprendono:

- **Foratura profili in vari diametri**
- **Asolatura di varie dimensioni**
- **Zincatura a caldo od elettrolitica**
- **Verniciatura a spruzzo e catramatura, previa sabbiatura**
- **Saldatura di elementi supplementari**
- **Tagli inclinati**
- **Scantonatura**
- **Assemblaggio**

Inoltre si eseguono lavori di meccanica di precisione quali:

- tornitura
- fresatura
- stozzatura
- rettifica
- elettroerosione etc.

### **Supply specifications**

The weights and relative quantities taken from the following tables are theoretic, and therefore at the time of consignment they may vary by  $\pm 10\%$ . This variation, due to manufacturing necessities, is valid also for the quantities indicated on the confirmation of order.

Profilumbra S.p.A. reserves the right to make any changes or improvements to its products that it considers necessary at any time and without notice.

The values given in the manual are to be considered theoretic, and the user is responsible for correctly interpreting the data regarding each individual usage situation.

### **Additional supplies and services**

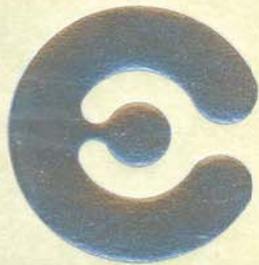

**Profilumbra S.p.A.** is able to provide its customers with a wide range of accessory services that complete the picture of a company that is at the service of the user.

We can perform any of the following additional workings on the profiles we produce:

- **Drilling holes of various diameters**
- **Slotting in various dimensions**
- **Hot or electrolytic galvanizing**
- **Spray painting and tarring (after sandblasting)**
- **Welding of supplementary elements**
- **Angled cuts**
- **Chamfering**
- **Assembly**

In addition, the following precision machining work is available:

- lathing
- milling
- slotting
- grinding
- electrical discharge machining (EDM), etc.

# CERTIFICATO DEL SISTEMA DI GESTIONE PER LA QUALITÀ QUALITY MANAGEMENT SYSTEM CERTIFICATE

Si dichiara che il sistema di gestione per la Qualità dell'Organizzazione:  
We certify that the Quality Management System of the Organization:

Reg. No: 1333 – A

## PROFILUMBRA S.p.a

Indirizzo/Address:

Zona Industriale  
06029 Valfabbrica PG Italia

È conforme alla norma/Is in compliance with the standard:

**UNI EN ISO 9001:2008**  
ISO 9001:2008

Per i seguenti prodotti-servizi/For the following products-services:

**Progettazione e realizzazione di profilati metallici a freddo, sistemi di rivestimento gallerie e pannelli fono assorbenti-fonoisolanti**

*Design and manufacturing of cold metal profiles, tunnel lining systems and sound absorbing,insulating panels*

EA: 17

*Il mantenimento della certificazione è soggetto a sorveglianza annuale e subordinato al rispetto dei requisiti essenziali CERMET.  
Maintenance of the certification is subject to annual survey and dependent upon the observance of CERMET basic requirements.*

Rilascio certificato/Certificate issuance: 2000-05-19  
Ultima modifica/Last modification: 2009-09-25  
Prossimo rinnovo/Following renewal: 2012-09-24

# Alcuni dei molti utilizzi dell'Omega Rinforzato ORP Some of many uses of Reinforced Omega ORP

Maggiore superficie d'appoggio rispetto all'omega tradizionale di pari caratteristiche tecniche

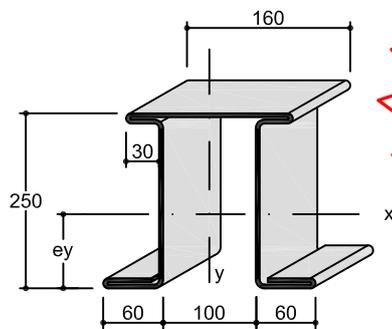

Greater support surface compared to traditional omegas of equal specifications

Facilità di montaggio con risultato estetico di rilievo nell'utilizzo quale supporto di pannelli per controsoffittature e materiale isolante, senza la presenza di interruzioni sulla superficie in vista, grazie alla possibilità di montaggio in appoggio o in sospensione mantenendo le eccezionali caratteristiche tecniche.

Easy to assembly with remarkable aesthetic effect, specially if used as shelves for suspended ceilings and insulating material without interruptions in the surface of the ceiling, thanks to the possibility to support from the bottom or suspended, preserving extraordinary technical features.

## VANTAGGI DEI PROFILI RINFORZATI RISPETTO AI PROFILI TRADIZIONALI ED IPE

- **Risparmio economico** sul costo della travatura secondaria delle coperture o delle tamponature variabile da un minimo di un 20% ad un max del 33%
- **Notevole incremento delle caratteristiche di resistenza a flessione** anche nella direzione ortogonale dell'asse del profilo , caratteristica che lo rende particolarmente adatto all'utilizzo quale travatura secondaria su coperture con falde molto inclinate evitando deformazioni flessionali trasversali
- **Struttura delle travi secondarie più leggera del 20-25%**, ciò permette l'utilizzo di travi primarie più piccole con risparmio dal punto di vista economico e pratico rilevante;
- **Campate più lunghe (anche più di 10 m con ORP250) e profili maggiormente distanziati**, grazie al notevole incremento delle caratteristiche di resistenza, a parità di peso, rispetto ad un profilo tradizionale
- **Minimizzazione dei problemi di deformazione** dei pannelli (piani o grecati) che vi si appoggiano grazie all'ampiezza della testa del profilo che permette, inoltre di realizzare con facilità le giunzioni
- **I profili, possono essere anche realizzati in acciaio di qualità migliorandone così ulteriormente le caratteristiche meccaniche ed aumentando quindi il vantaggio economico e le relative percentuali di risparmio**
- **Facilità di montaggio** in quanto i suddetti profili possono essere forniti asolati e tagliati a misura, pronti per l'installazione
- **Antinfortunistico** grazie al raddoppio di spessore rispetto all'omega tradizionale evita al montatore la possibilità di venire a contatto con bordi taglienti

## ADVANTAGES OF REINFORCED PROFILES COMPARED TO TRADITIONAL PROFILES AND IPE

- **Savings** on the cost of secondary trusses for roofs and curtain walls varying from a minimum of 20% to a maximum of 33%
- **Considerable increase in flexural strength** in the direction perpendicular to the axis of the structural shape axis, a feature that makes it particularly suitable for use as a secondary truss for roofs with very steep pitches that allows to avoid transversal inflectional bucklings
- **20-25% lighter secondary truss structure**, which makes it possible to use smaller primary trusses; more practical and offers substantial cost savings
- **Wider spans and greater distance between structural shapes**, thanks to the considerable increase in resistance per kilogram compared to traditional structural shape
- **Minimizes deformation problems** in panels (flat or ribbed) placed against it, thanks to the wide structural shape head, which also makes the assembly of joints easier
- **The structural shapes can also be made in high-quality steel, further improving mechanical performance and increasing the economic advantage and the amount of savings**
- **Easier assembly**, since these structural shapes can be supplied already slotted and cut to measure, ready for installation
- **Safety value** thanks to the 180° doubling of the sheetmetal thickness, compared to the traditional Omega, avoiding the mounters to come into contact with sharp edges.

## RELAZIONE P1352/99 DEL 15/04/1999

(Rif. Commessa 1352/99 del 20/01/1999)

OGGETTO: INDAGINI SPERIMENTALI IN LABORATORIO SU  
PROFILATI SPECIALI IN ACCIAIO

STRUTTURA:	Profilati speciali in acciaio
LOCALITA':	Laboratorio autorizzato SGM S.r.l.
COMMITTENTE:	Profilumbra

Direttore Tecnico *SGM S.r.l. - Ingegneria Sperimentale*  
Dott. Ing. Alberto Bufali

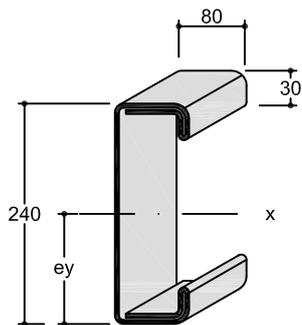

---

**SGM S.r.l.** Rilievi, monitoraggi, elaborazioni dati e prove sperimentali su strutture, terreni e materiali in situ ed in laboratorio

## Profili prelaborati per cornici

Profili prelaborati per la realizzazione con estrema semplicità (tramite piegatura e fissaggio solo su un'estremità) di cornici di qualsiasi dimensione, adatte alla costruzione di pannelli isolanti, cornici vetrate, cartelloni pubblicitari, etc.

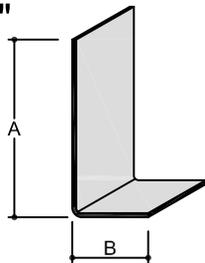

Realizzabili anche con profili con sezione a "C"

Alcuni esempi di profili realizzati da pressopiegatrice

VISITATE IL NOSTRO CATALOGO COMPLETO E SEMPRE AGGIORNATO ALL'INDIRIZZO INTERNET [www.PROFILUMBRA.it](http://www.PROFILUMBRA.it)

Kg/ml 1,570

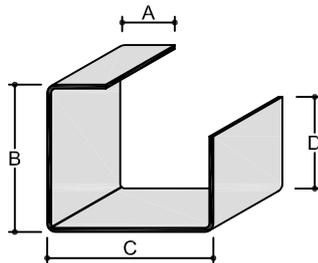

## CS Canalino fermavetro a scatto

Sp. 0,8 mm  
Sv. = 38 (46) mm  
Kg/ml 0,239 (0,289)

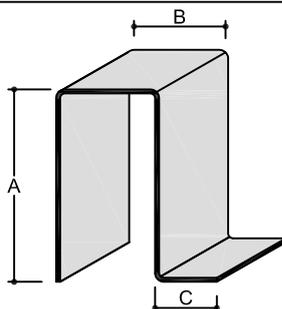

## CU

REALIZZABILE IN  
QUALSIASI DIMENSIONE

## OMU

REALIZZABILE IN  
QUALSIASI DIMENSIONE

## LAVORAZIONI SUPPLEMENTARI

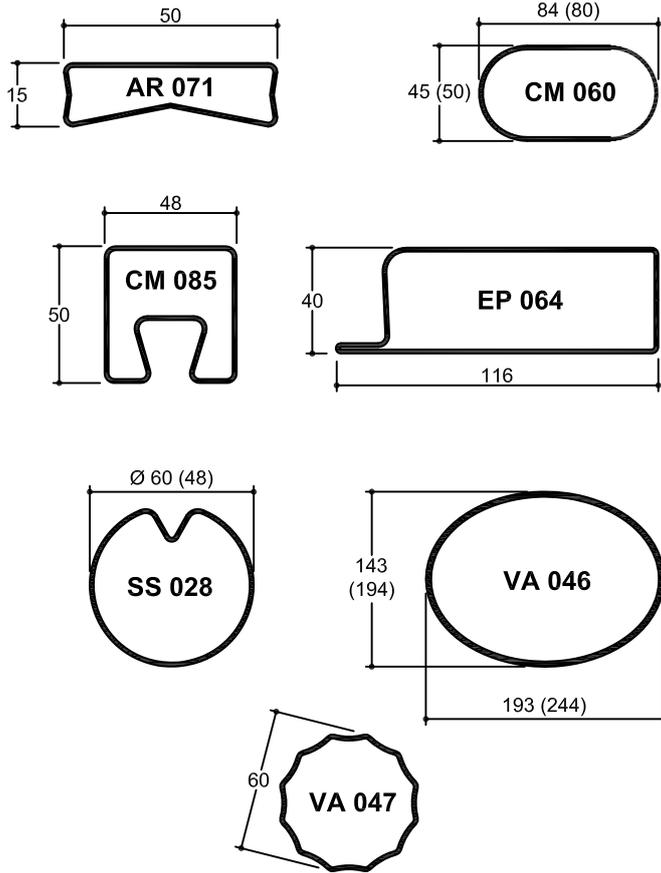

Su tutti i ns. profili è possibile realizzare:

- Forature / asolature di qualsiasi dimensione, a passo costante o variamente disposte sulla sezione
- "Tasche" di aggancio per staffe
- Scantonature
- Marcatura profili (generica o con vs. logo)
- Tagli inclinati
- Lavorazioni accessorie particolari a richiesta
- Saldatura di ogni genere
- Granigliatura
- Verniciatura

**REALIZZIAMO PROFILI APERTI DI QUALSIASI SAGOMA, DIMENSIONE, SPESSORE, FORATURA E PROFILI CHIUSI SALDATI CON TECNOLOGIA H.F. FINO AD UNO SVILUPPO DI 1500 mm. ED UNO SPESSORE DI 12 mm.**

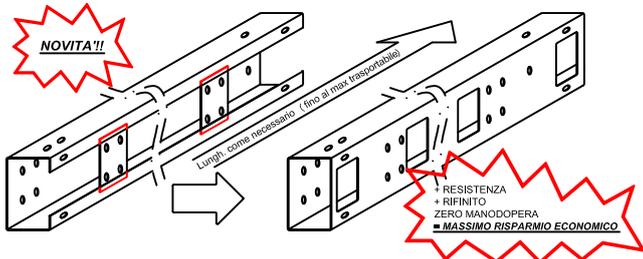

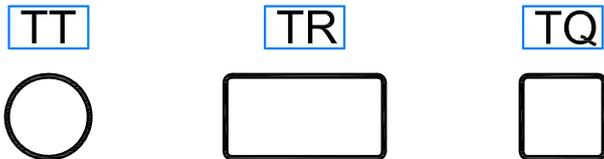

# TS Tubi Speciali

## Profili TUBOLARI

SALDATI AD INDUZIONE CON TECNOLOGIA H.F.  
CON SPECIALI OPERAZIONI DI FORATURA, ASOLATURA E SCANTONATURA

WELDED BY H.F. TECHNOLOGY WITH PROPER DRILLING - SLOTTING - CHAMFERING OPERATIONS

Profilo "C" con piastre forate e saldate sostituito da profilo tubolare speciale forato/asolato.  
Sul tubolare sono realizzabili, ove necessario, aperture per il passaggio di una mano allo scopo di facilitare le operazioni di montaggio dei fissaggi di dimensioni personalizzabili là dove il bullone non è passante

Special drilled/slotted cold-formed tubular shape replaces drilled and welded plates "C" profiles.  
If necessary, openings on tubular shapes can be performed in order to allow the passing of a hand for helping during on demand fastenings assembling operations if there are no throughbolts

- VANTAGGI:
- Realizzazione di manufatto unico
  - Eliminazione operazioni di saldatura
  - Eliminazione difetti di allineamento delle piastre (e di conseguenza dei fori)
  - Semplificazione e maggiore velocità nel montaggio
  - Aspetto di un profilo "finito", progettato e ottimizzato per il proprio utilizzo.

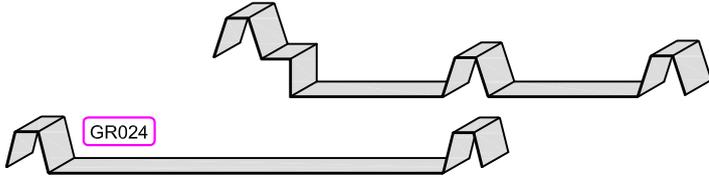

- ADVANTAGES:
- Single handwork performance
  - Welding operations delation
  - Plates (and therefore drills) alignment defects delation
  - Easier and faster assembly
  - Better trimmed profile appearance, projected and optimised for its proper use

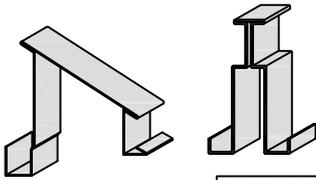

VISITATE IL NOSTRO CATALOGO COMPLETO E SEMPRE AGGIORNATO ALL'INDIRIZZO INTERNET  
[www.PROFILUMBRA.it](http://www.PROFILUMBRA.it)

# Profili per IMPIANTI FOTOVOLTAICI

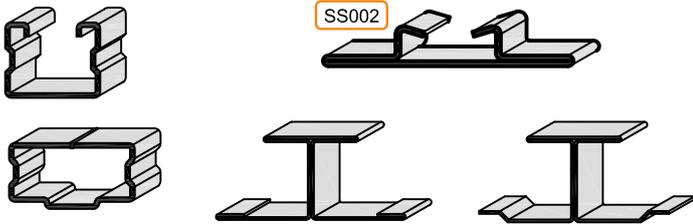

Lamiere di copertura di supporto per pannelli in film sottile

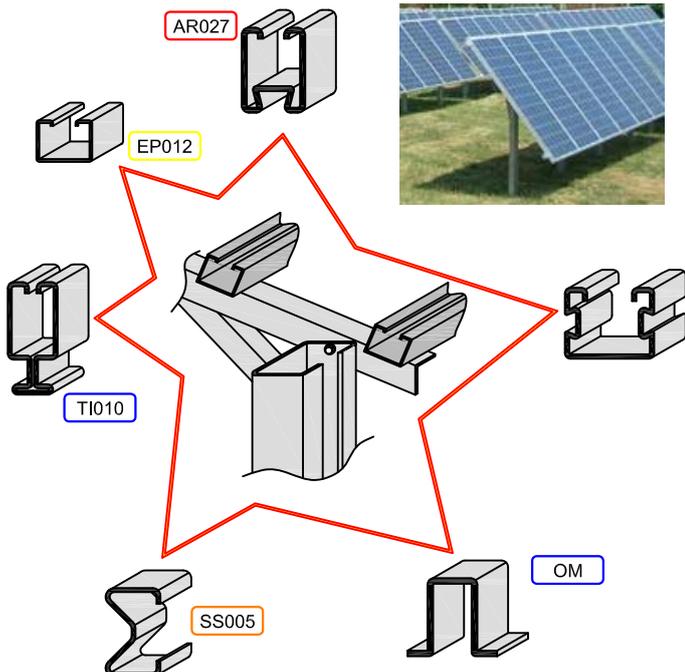

Arcarecci di supporto per pannelli fotovoltaici con funzione:  
- portante  
- sostegno pannelli solari  
- canale per passaggio cavi e raccolta acque

Profili guida per ancoraggio pannelli fotovoltaici

Esempio di realizzazione di telaio per supporto pannelli fotovoltaici con nostri profilati "standard" (L-AN-U-C-Omega) o con profili speciali realizzabili a disegno, opportunamente forati/asolati e tagliati a misura.

# Impianto fotovoltaico realizzato con nostri profili

**REALIZZIAMO PROFILI APERTI DI QUALSIASI SAGOMA, DIMENSIONE, SPESSORE, FORATURA E PROFILI CHIUSI SALDATI CON TECNOLOGIA H.F. FINO AD UNO SVILUPPO DI 1500 mm. ED UNO SPESSORE DI 12 mm.**

**- AR -**

**Settore Scaffalature**  
**Arredamenti metallici**

**Scaffalature in genere**

- scaffalature cantilever, drive-in, porta pallets e carrelli traslatori  
(da AR001 a AR055, da AR072 a AR093, AR096, AR099)
- ballatoi e soppalchi  
(AR056, AR057)

**Mobili metallici in genere**

- componenti arredamenti metallici  
(da AR058 a AR071, AR094, AR095, AR098)

**Metal Shelving, furnishings**  
**and fittings division**

**Shelving**

- *cantilever shelving, drive-in shelving, shelving for pallets and traveling lift trucks*  
(from AR001 to AR055, from AR072 to AR093, AR096, AR099)
- *galleries and false ceilings*  
(AR056, AR057)

**Metallic furniture**

- *metallic furniture components*  
(from AR058 to AR071, AR094, AR095, AR098)

A richiesta del cliente si realizzano:

- profili di dimensioni, spessori e forature diverse da quelle riportate in catalogo.

- **profili chiusi saldati con tecnologia H.F.**

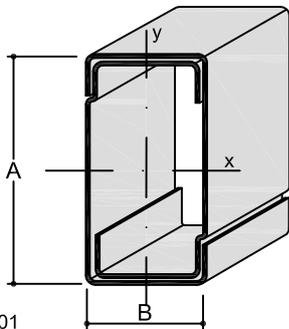

Following our clients needs we perform:

- *Structural shapes with dimension, thicknesses, and different hole/slot patterns from those listed in the catalog.*

- ***Closed profiles (pipes) welded with H.F. technology***

### Settore carpenteria metallica

#### **Carpenteria metallica in genere**

- realizzazione macchinari di vario genere, nastri trasportatori  
(da CM001 a CM006, CM075, CM076, CM079, CM080, CM082, CM086, CM092, CM096)

#### **Prefabbricazione metallica in genere**

- case prefabbricate, box e cabine, essiccatoi  
(da CM007 a CM024, CM062, CM071, CM088, CM093, CM094)
- celle frigorifere, impianti di aspirazione e condizionamento  
(da CM034 a CM039)
- cassonetti nettezza urbana  
(da CM040 a CM042)
- passerelle  
(CM063, CM064, CM068)
- serre e vigne in genere  
(da CM025 a CM033, da CM056 a CM059, CM066, CM067, da CM069 a CM072, CM074, CM077, CM078, da CM083 a CM085, CM097)
- strutture in genere  
(CM060, CM065, CM076)

#### **Grigliati in genere**

- grigliati, frangisole, recinzioni  
(da CM043 a CM055, CM061, CM073, CM081, CM087, da CM089 a CM091)

#### **Fotovoltaico**

(CM095, da CM098 a CM100)

**A richiesta del cliente si realizzano:**

- profili di dimensioni, spessori e forature diverse da quelle riportate in catalogo.

**- profili chiusi saldati con tecnologia H.F.**

### Sheet Metal Products Division

#### **Metal structural work**

- *construction equipment of various kinds, conveyor belts*  
(from CM001 to CM006, CM075, CM076, CM079, CM080, CM082, CM086, CM092, CM096)

#### **Prefabricated metal components**

- *prefabricated houses, booths and sheds, drying chambers*  
(from CM007 to CM024, CM062, CM071, CM088, CM093, CM094)
- *cold-storage rooms, suction, exhaust and air-conditioning systems*  
(from CM034 to CM039)
- *urban waste collection receptacles*  
(from CM040 to CM042)
- *catwalk*  
(CM063, CM064, CM068)
- *greenhouses and vineyards generally*  
(from CM025 to CM033, from CM056 to CM059, CM066, CM067, from CM069 to CM072, CM074, CM076, CM078, from CM083 to CM085, CM097)
- *structures in general*  
(CM060, CM065, CM076)

#### **Gratings**

- *gratings, shading devices, fencing*  
(from CM043 to CM055, CM061, CM073, CM081, CM087, from CM089 to CM091)

#### **Fotovoltaico**

(CM095, from CM098 to CM100)

**Following our clients needs we perform:**

- *Structural shapes with dimension, tick-nesses, and different hole/slot patterns from those listed in the catalog.*

**- *Colsed profiles (pipes) welded with H.F. technology***

Recinzione antivandolica realizzata con profilo CM047 + CM048

Recinzione antivandolica realizzata con profilo CM047 + CM048

## - EP -

### Settore edilizia prefabbricata

#### **Prefabbricati in cemento**

- rinforzo, ancoraggi per pannelli  
(da EP001 a EP003, da EP006 a EP008, da EP057 a EP063)
- fissaggi lastre di polycarbonato  
(EP004, EP005, EP009, EP010, EP049, EP051)
- canaline portacavi  
(EP011, da EP013 a EP015)
- canaline di fissaggio per impianti in genere  
(EP012, EP050, EP052, EP053)

#### **Pareti attrezzate**

- casseformi  
(EP064, da EP066 a EP074)
- controsoffittature e soffittature  
(EP016, EP017, da EP031 a EP040, EP076)
- pareti coibentate  
(da EP044 a EP046)
- pareti ventilate, attrezzate, pareti in cartongesso  
(da EP018 a EP030, da EP041 a EP043, EP048, da EP054 a EP056)
- tetti e coperture in genere  
(EP047, EP065, EP075)

A richiesta del cliente si realizzano:

- profili di dimensioni, spessori e forature diverse da quelle riportate in catalogo.

- **profili chiusi saldati con tecnologia H.F.**

### Prefabricated Building Components Division

#### **Prefabricated components in cement**

- *reinforcement, anchors for panels*  
(from EP001 to EP003, from EP006 to EP008, from EP057 to EP063)
- *polycarbonate plate fasteners*  
(EP004, EP005, EP009, EP010, EP049, EP051)
- *cable throughs*  
(EP011, from EP013 to EP015)
- *various conduits, ducts, etc.*  
(EP012, EP050, EP052, EP053)

#### **Specially equipped walls**

- *formwork*  
(EP064, from EP066 to EP074)
- *false ceilings and ceilings*  
(EP016, EP017, from EP031 to EP040, EP076)
- *insulated walls*  
(EP044-EP046)
- *storage walls, ventilated walls, plasterboard walls*  
(from EP018 to EP030, from EP041 to EP043, EP048, from EP054 to EP056)
- *roofing in general*  
(EP047, EP065, EP075)

Following our clients needs we perform:

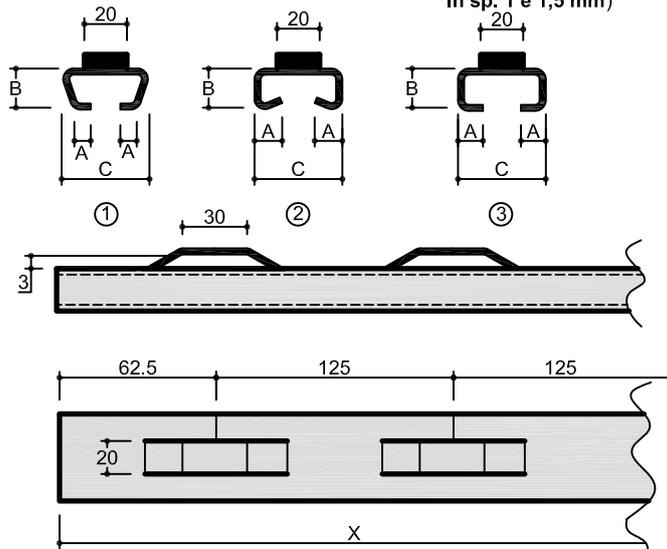

- *Structural shapes with dimension, tick-nesses, and different hole/slot patterns from those listed in the catalog.*

- ***Colsed profiles (pipes) welded with H.F. technology***

## EP 001

ANCORAGGI PER PANNELLI  
PREFABBRICATI IN CALCESTRUZZO

Siamo in grado di fornire  
anche il relativo  
accessorio (piatto zincato  
senzimir da mm 20x400  
in sp. 1 e 1,5 mm)

Pos.	A	B	C	Sp.	Sv.	Kg/ml

## - GR -

### Settore lamiera grecate

#### Lamiere grecate in genere

- per coperture  
(da GR001 a GR003)
- per pannelli fotovoltaici  
(GR024)
- per pareti  
(GR004, GR013, GR023)
- per solai  
(GR005, GR007)
- super collaboranti per solai  
(GR006, GR008)
- grecatini per portoni industriali e vari utilizzi  
(da GR009 a GR012)
- grecatini per pannelli termoisolanti  
(GR014, GR015)

#### Accessori

- cappellotti  
(GR016, GR017)
- colmo centrale  
(GR018)
- traslucido neutro per punti luce  
(GR021, GR022)

A richiesta del cliente si realizzano:  
- profili di dimensioni, spessori e forature diverse da quelle riportate in catalogo.

- **profili chiusi saldati con tecnologia H.F.**

### Ribbed Sheet Metal Division

#### Ribbed sheet

- for roofing  
(GR001-GR003)
- for photovoltaic panels  
(GR024)
- for walls  
(GR004, GR013, GR023)
- for floors  
(GR005, GR007)
- super ribbed sheet for collaborants" for floors  
(GR006, GR008)
- low profile ribbed sheet for industrial doors and for miscellaneous uses  
(GR009-GR012)
- low profile ribbed sheet for insulating panels  
(GR014-GR015)

#### Accessories

- caps  
(GR016-GR017)
- roof ridges  
(GR018)
- neutral traslucent ribbed sheet for lighting fixtures  
(GR021, GR022)

Following our clients needs we perform:  
- Structural shapes with dimension, thicknesses, and different hole/slot patterns from those listed in the catalog.

- **Closed profiles (pipes) welded with H.F. technology**

# LAMIERE GRECATE

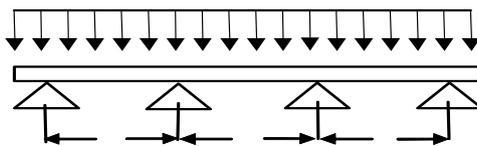

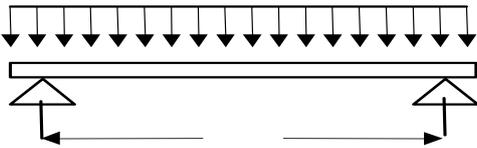

## CRITERI DI CALCOLO

### CONSIDERATI :

Secondo la norma CNR-UNI 10022/84 per il calcolo delle caratteristiche geometriche e statiche dei profili sagomati a freddo.

Tensione massima del materiale utilizzato pari a **1450 Kg/cm<sup>2</sup>**

Per determinare i valori del carico massimo uniformemente distribuito “**p**” e delle relative frecce “**f**” si sono adottati i seguenti criteri di calcolo:

I valori di carico indicati nelle righe inferiori delle tabelle di portata rappresentano i carichi massimi uniformemente distribuiti che possono gravare sulla lamiera grecata, osservando una freccia massima pari a 1/200 della luce tra gli appoggi, quando tale valore risulta inferiore a quello calcolato per il limite di sollecitazione massima.

# RIBBED SHEET METAL

## CALCULATIONE CRITERIA:

*In compliance with CNR-UNI 10022/84 regulations for calculating geometric and static characteristics of cold-rolled metal shapes*

*Maximum stress of the material used = 1.450 Kg/cm<sup>2</sup>*

*To determine the values of the maximum uniformly distributed load “**p**” and of the relative deflections “**f**” the following calculation criteria have been used:*

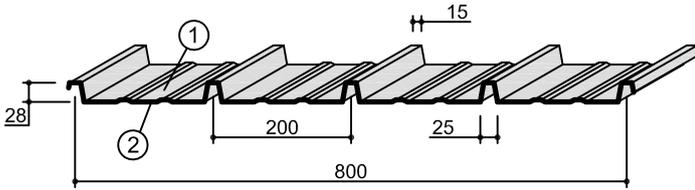

$$M = \frac{1}{8} pL^2 \quad f = \frac{5}{384} \times \frac{pL^4}{EJ}$$

$$M = \frac{1}{10} pL^2 \quad f = \frac{3}{384} \times \frac{pL^4}{EJ}$$

*The load values shown in the bottom rows of the tables represent the maximum uniformly distributed loads that can rest on ribbed sheet, resulting in a maximum deflection of 1/200 of the span between supports, when this value is less than that calculated for the maximum stress limit*

	(390)	(200)	(115)	(73)	(48)
1,0	434	278	154	141	108
	(488)	(250)	(139)	(91)	(61)

- Il valore del carico max e' determinato dalla verifica di resistenza  $\sigma \text{ amm.} = 1.450 \text{ Kg/cm}^2$   
- Il valore tra parentesi e' legato alla limitazione: Freccia  $\leq 1/150$  luce

- CRITERI DI CALCOLO: La lastra e' vincolata agli appoggi con perni filettati che ne impediscono lo scorrimento. Pur essendo dunque il vincolo alle estremita' fisso, il dimensionamento e' fornito a vantaggio della stabilita' con vincoli semiscorrevoli.

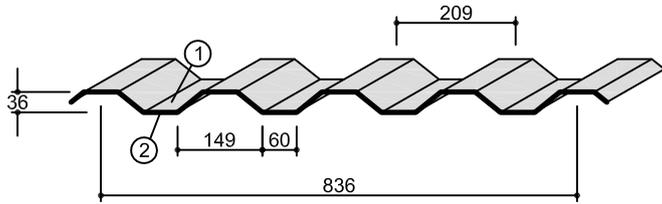

1) con vincolo scorrevole:  $M \text{ max} = pL^2/8$

2) con vincolo fisso:  $M \text{ max} = 0$

La sollecitazione considerata e' dunque pari al valore medio delle due sopra indicate.

(SE036, SE037)
- portoni industriali  
(da SE040 a SE051, da SE086 a SE088, SE091, SE092, da SE095 a SE097, da SE102 a SE104, da SE106 a SE108)
- rinforzi per serramenti in PVC  
(da SE052 a SE062, SE109, SE110)

#### **Porte in genere**

- basculanti, scorrevoli  
(da SE063 a SE068, SE089, SE090, SE100)
- blindate, taglia fuoco  
(da SE069 a SE085, SE099, SE101)

A richiesta del cliente si realizzano:

- profili di dimensioni, spessori e forature diverse da quelle riportate in catalogo.

- **profili chiusi saldati con tecnologia H.F.**

### Ribbed Sheet Metal Division

#### **Ribbed sheet**

- *rolling shutters and gates*  
(from SE001 to SE035, SE038, SE039, SE093, SE094, SE098, SE105)
- *extendable gates*  
(SE036, SE037)
- *industrial doors*  
(from SE040 to SE051, from SE086 to SE088, SE091, SE092, from SE095 to SE097, from SE102 to SE104, from SE106 to SE108)
- *reinforcements for windows and door frames in PVC*  
(from SE052 to SE062, SE109, SE110)

#### **Doors**

- *tilting doors, sliding doors*  
(from SE063 to SE068, SE089, SE090, SE100)
- *armor-plated door*  
(from SE069 to SE085, SE099, SE101)

Following our clients needs we perform:

- *Structural shapes with dimension, thicknesses, and different hole/slot patterns from those listed in the catalog.*

- ***Closed profiles (pipes) welded with H.F. technology***

### Settore stradale

#### **Segnaletica stradale (cartellonistica)**

(da SS001 a SS003, SS028)

#### **Barriere stradali**

(PP, da SS004 a SS014, SS027, SS029)

#### **Barriere acustiche, fonoassorbenti e fonoisolanti**

(da SS018 a SS026, da SS030 a SS045, TUB, XHEA, XL, XSS34, XSS36, XSS43)

#### **Impiantistica stradale (ns. brevetti)**

(da SS015 a SS017)

- rivestimento gallerie
- barriere frangiluce
- barriere fonoassorbenti
- dispositivo antiribaltamento
- dispositivo antisonno

A richiesta del cliente si realizzano:

- profili di dimensioni, spessori e forature diverse da quelle riportate in catalogo.

- **profili chiusi saldati con tecnologia H.F.**

### Street Furniture and Traffic System Division

#### **Road signs**

(from SS001 to SS003, SS028)

#### **Metallic road barriers**

(PP, from SS004 to SS014, SS027, SS029)

#### **Noise barriers, deadening and sound-insulating**

(from SS018 to SS026, from SS030 to SS045, TUB, XHEA, XL, XSS34, XSS36, XSS43)

#### **Traffic safety systems (our patents)**

(from SS015 to SS017)

- *tunnel linings*
- *anti-glare barriers*
- *deadening barriers*
- *vehicle overturning prevention device*
- *“wake-up” device*

Following our clients needs we perform:

- *Structural shapes with dimension, thicknesses, and different hole/slot patterns from those listed in the catalog.*

- ***Closed profiles (pipes) welded with H.F. technology***
