ARCHIGRAM

In 1961 a small group of frustrated architects in London got together to talk, mostly breakfast, on 'Archigram' (as opposed to a 'telegram' or 'semi-gramma'). Inhabitations, appropriations and invention have sustained the group (and others who have subsequently joined it) through an ever-widening series of experimental projects that have carried the name of the original breakfast.

WALKING CITY

The 'Walking City', the 'Plug-in City', the 'Living Pod' and the 'Summer City' - which is illustrated on this panel - are among the seminal architectural statements of the 1960's - yet, in their almost questioning of the need for the buildings at all, they threaten the discipline of architecture itself. They suggest that in order to survive we must invent new artifacts, new situations, and regard the life as urban merely as a form of reference that does not demand a 'house' or a 'city'.

LIVING POD

In 1968 the group was invited to submit a scheme for an entertainment facility in Monte Carlo. The scheme was accepted and the blue panels illustrate the development of this project from the competition stage to the final design.

In 1972 the group was asked to take part in a second competition at another site in Monte Carlo, this time for a Summer Casino, and two designs were submitted. They are known as the 'Palm Tree' Casino (shown on the red panel), and the 'Chemiseur' Casino (shown on the yellow panel).

Il Monumento Continuo 1969

PER IL MONUMENTO CONTINUO
 Il progetto del Monumento Continuo è un'opera di architettura che si pone l'obiettivo di creare un nuovo spazio urbano in grado di integrare il tessuto urbano esistente e di offrire un luogo di incontro e di scambio per la comunità. Il progetto è stato sviluppato in collaborazione con il Comune di New York e il Dipartimento di Architettura della Columbia University.
